- Azure Cloud
- AWS Cloud
- Docker
- CI/CD
- UML
- Adobe Photoshop
- Figma
- Blender 3D

WORK EXPERIENCE

Lambda3 Consulting — Full Time Software Developer OCTOBER 2020 — PRESENT

Worked on projects aligned with Agile philosophy. Participated in the development of a chat and customer service system for one of the main retail chains in Brazil, leading to increased market share, especially during the pandemic. Developed a banking account system for a company in the loyalty segment, using points redeemable through cashback. For a fast-growing fintech company, created an integration system that generated bank slips based on customer orders.

Delage Logistics & Supply Chain — Full Time Systems Analyst MARCH 2018 — OCTOBER 2020

Developed a Warehouse Management System and related logistics software. Conducted client visits for product sales and deployments in Brazil and Argentina. Designed and implemented system interfaces for third-party integration (ERPs and automation), and maintained legacy systems. Created APIs and Windows Services.

Prime System Technical Courses — Part Time Teacher MARCH 2017 — MARCH 2018

Taught Introduction to Programming with C#, Unity Game Engine, and 3D modeling.

EDUCATION

Federal University of Juiz de Fora — Bachelor of Information Systems Incomplete

Made significant contributions to academic activities prior to leaving the program in 2018:

- Member of junior enterprise CODE
- Member of Group for Computer Graphics, Image and Vision
- Member of Computer Science Tutorial Education Group where I participated in the development of EducAR Quadrics and Localizar UFJF apps
- Course taught to 40 students about 3D modeling
- Co-author of two academic articles [\[1\]](#) [\[2\]](#)
