WORK EXPERIENCE

Checkout.com — Full Time Software Engineer
AUG 2023 — PRESENT

Developing and enhancing features for various services, notably in report generation, client settlements, invoices, and related areas. My work involves creating robust and efficient solutions that improves the financial reporting and reconciliation processes, contributing significantly to the company's operational excellence and customer satisfaction

Lambda3 Consulting — Full Time Software Developer
OCT 2020 — AUG 2023

Worked on projects aligned with Agile philosophy. Participated in the development of a chat and customer service system for one of the main retail chains in Brazil, leading to increased market share, especially during the pandemic. Developed a banking account system for a company in the loyalty segment, using points redeemable through cashback. For a fast-growing fintech company, created an integration system that generated bank slips based on customer orders.

Delage Logistics & Supply Chain — Full Time Systems Analyst
MAR 2018 — OCT 2020

Developed a Warehouse Management System and related logistics software. Conducted client visits for product sales and deployments in Brazil and Argentina. Designed and implemented system interfaces for third-party integration (ERPs and automation), and maintained legacy systems. Created APIs and Windows Services.
